Student(s):   Project Presentation, CS87 Sp12

1. Was the project presented in a top-down manner starting with motivation for the research question being addressed? Were the main points of the project made clear?

2. Was there a clear question being addressed with this work? Were the parallel and/or distributed aspects of the project clearly described?

3. Was the experimental procedure adequately described? Were results shown?

4. Were graphs and figures used when appropriate?

5. In general, did slides contain an appropriate amount of information?

6. Did the presentation have a narrative flow with adequate transitions between sections of the talk? Did the speaker(s) address the audience?
