CS21: INTRODUCTION TO COMPUTER SCIENCE

Prof. Mathieson
Fall 2018
Swarthmore College
Outline Nov 28:

- Go over Quiz 4
- Classes vocab
- Finish: ScreenSaver class
- Start: baseball example (Player and Team classes)
- Examples of methods calling methods

Notes

- Lab 10 due MONDAY
- Quiz 5 this Friday
- Office hours Friday 3-5pm

I will not be on campus tomorrow (Thursday)
Quiz 4 common issues

1. data = [[100, 200, 300], [300, 200, 100]]
   data[1][2] = 100
   len(data[1]) = 3
   300 in data = False

2. constructor: 6-11, 16 (capital)
   function: 19, 22
   mystery, main
   methods: 4, 5, 12, 13, 18, 20
   <instance>.method(…)

3. a = 3
   b
   7 / 5

4. "weekend"

5. t = "weekend!"
Discuss with a partner

Image 4 ways of creating a snowflake in main. Which of these show abstraction? Which of them show encapsulation?

A

```python
snowflake_lines = make_snowflake(click, 50)
for line in snowflake_lines:
    line.draw(win)
```

B

```python
flake_halfa = SnowflakeLeft(click, 50)
flake_halfb = SnowflakeRight(click, 50)
flake_halfa.draw(win)
flake_halfb.draw(win)
```

C

```python
flake = Snowflake(click, 50)
flake.draw(win)
```

D

```python
l1 = Line(Point(x,y+size), Point(x,y-size))
l2 = Line(Point(x+size,y), Point(x-size,y))
l3 = Line(Point(x+size/2,y+size/2), Point(x-size/2,y-size/2))
l4 = Line(Point(x-size/2,y+size/2), Point(x+size/2,y-size/2))
lines = [l1,l2,l3,l4]
for l in lines:
    l.draw(win)
```
Discuss with a partner

Image 4 ways of creating a snowflake in main. Which of these show abstraction? Which of them show encapsulation?

A. `snowflake_lines = make_snowflake(click, 50)`
   `for line in snowflake_lines:`
   `line.draw(win)`

B. `flake_halfa = SnowflakeLeft(click, 50)`
   `flake_halfb = SnowflakeRight(click, 50)`
   `flake_halfa.draw(win)`
   `flake_halfb.draw(win)`

C. `flake = Snowflake(click, 50)`
   `flake.draw(win)`

D. `l1 = Line(Point(x,y+size), Point(x,y-size))`
   `l2 = Line(Point(x+size,y), Point(x-size,y))`
   `l3 = Line(Point(x+size/2,y+size/2), Point(x-size/2,y-size/2))`
   `l4 = Line(Point(x-size/2,y+size/2), Point(x+size/2,y-size/2))`
   `lines = [l1,l2,l3,l4]`
   `for l in lines:`
   `l.draw(win)`

Encapsulated but not abstract
Discuss with a partner

Image 4 ways of creating a snowflake in main. Which of these show abstraction? Which of them show encapsulation?

A  
Encapsulated but not abstract

```
snowflake_lines = make_snowflake(click, 50)
for line in snowflake_lines:
    line.draw(win)
```

B

```
flake_halfa = SnowflakeLeft(click, 50)
flake_halfb = SnowflakeRight(click, 50)
flake_halfa.draw(win)
flake_halfb.draw(win)
```

Abstract but not encapsulated

C

```
flake = Snowflake(click, 50)
flake.draw(win)
```

D

```
l1 = Line(Point(x,y+size), Point(x,y-size))
l2 = Line(Point(x+size,y), Point(x-size,y))
l3 = Line(Point(x+size/2,y+size/2), Point(x-size/2,y-size/2))
l4 = Line(Point(x-size/2,y+size/2), Point(x+size/2,y-size/2))
lines = [l1,l2,l3,l4]
for l in lines:
    l.draw(win)
```
Discuss with a partner

Image 4 ways of creating a snowflake in main. Which of these show abstraction? Which of them show encapsulation?

A
Encapsulated but not abstract

```
snowflake_lines = make_snowflake(click, 50)
for line in snowflake_lines:
    line.draw(win)
```

B

```
flake_halfa = SnowflakeLeft(click, 50)
flake_halfb = SnowflakeRight(click, 50)
flake_halfa.draw(win)
flake_halfb.draw(win)
```

Abstract but not encapsulated

C

```
flake = Snowflake(click, 50)
flake.draw(win)
```

Abstract and encapsulated

```
l1 = Line(Point(x,y+size), Point(x,y-size))
l2 = Line(Point(x+size,y), Point(x-size,y))
l3 = Line(Point(x+size/2,y+size/2), Point(x-size/2,y-size/2))
l4 = Line(Point(x-size/2,y+size/2), Point(x+size/2,y-size/2))
lines = [l1,l2,l3,l4]
for l in lines:
    l.draw(win)
```
Discuss with a partner

Image 4 ways of creating a snowflake in main. Which of these show abstraction? Which of them show encapsulation?

A. Encapsulated but not abstract

```
snowflake_lines = make_snowflake(click, 50)
for line in snowflake_lines:
    line.draw(win)
```

B. Abstract but not encapsulated

```
flake_halfa = SnowflakeLeft(click, 50)
flake_halfb = SnowflakeRight(click, 50)
flake_halfa.draw(win)
flake_halfb.draw(win)
```

C. Abstract and encapsulated

```
flake = Snowflake(click, 50)
flake.draw(win)
```

D. Neither abstract nor encapsulated

```
l1 = Line(Point(x,y+size), Point(x,y-size))
l2 = Line(Point(x+size,y), Point(x-size,y))
l3 = Line(Point(x+size/2,y+size/2), Point(x-size/2,y-size/2))
l4 = Line(Point(x-size/2,y+size/2), Point(x+size/2,y-size/2))
lines = [l1,l2,l3,l4]
for l in lines:
    l.draw(win)
```
